Subject: Honeywell Hopewell, VA - Final CLLT Valve Replacement

Mr. Abraham,

At the time of our meeting on October 7th Honeywell had upgraded 91 of the 92 valves included in our disclosures to meet the certified low leak technology (CLLT) requirements with 1 valve remaining to be upgraded based on the availability of the equipment. Honeywell replaced this last valve on November 3, 2015 and with this replacement, all 92 of the valves have been addressed and restored to meet the CLLT requirement.

Please let me know if you have any questions or require additional information.

Phillip Sparks
